

Hepatitis C & Drug User Health Intensive Preceptorship Program: Spring 2020

This clinical education program is provided by the Mount Sinai Institute for Advanced Medicine and funded through the New York State Department of Health AIDS Institute Clinical Education Initiative. It is in collaboration with REACH Medical and provides an intensive experience for New York State medical providers.

The REACH Project owns and operates the first low threshold, harm reduction medical practice in Ithaca, NY: REACH Medical. REACH Medical offers a wide range of services including: opioid use disorder treatment, medical cannabis certification, Hep C treatment, primary care, and behavioral services in a stigma-free, inclusive setting.

Program Overview:
