Approved Adult Screening Instruments for Mental Health Problem Domains in NYS OASAS Certified Programs

Introduction: OASAS requires that all patients admitted to Certified Programs be screened for co-occurring mental health conditions in specified domains.

The following pages provide tables with the names of and links to the recommended screening instruments for required and non-required mental health domains.

Refer to *Guidance for the Use of Screening Instruments for Co-occurring Mental Health Conditions in NYS OASAS Certified Programs* for more detailed information before utilizing the screening instruments
